UROLOGY Advice to Patient

*"Unlike a traditional clinic, you will spend **up to four hours** in the clinic, so please come prepared to spend either all morning or all afternoon."*

NHS Yorkshire & Scarborough Teaching Hospital
Patient Information Leaflet PIL 1071 v3 Urology One Stop Clinic

What tests will I have in clinic?

Your specialist will decide which tests are needed, although not every patient will need a test. Possible tests available include:

- blood tests
- ultrasound scan
- X-ray
- flexible cystoscopy
- prostate examination and biopsy
- urinary flow rate evaluation
- urodynamics (bladder pressure studies).

You will be asked for a sample of urine and we will give you a container and tell you what to do, so please ensure that your bladder is comfortably full on arrival. More importantly, please don't use the toilet before you have been seen by the staff. There are water dispensers in the centre for you if you need to drink before giving your sample.

healthwatch East Riding of Yorkshire | 10 years

Service Name:	Bridlington Hospital		
Identified By:	Email	Date Recorded:	24 October 2023
Experience:	"Most outpatient appointments in Bridlington are miles away. Over the past few years I've had to travel to Sheffield, York, Malton, Scarborough, Hull with my late husband who was terminally ill. Since he died I've had appointments in Scarborough, Driffield, Wakefield, Hull and Bridlington. I'm 80 yrs old and it's really difficult getting to places so far away. We have a poor transport system in Bridlington. My last appointment in Hull was at 9am ! I had to leave home very very early, get a train to Hull and then walk to the hospital from the station. I don't think this is acceptable when we have a hospital in close proximity."
